

More power to find more treasure

CS-1M

SPECIFICATION

- **MOTION** power circuitry
- **Automatic operation, with discrimination**
- **ISOCON 20cm diam. head**
- **2 x PP3 9 volt battery power**
- **Robust, lightweight**
- **professional**
- **User-friendly**
- **Loudspeaker and headphone socket.**

CS-2MP

SPECIFICATION

- **Superlite open-centre search-head**
- **Detachable control box**
- **MOTION power circuitry**
- **Automatic operation**
- **Full range tone/no tone discrimination**
- **All metal mode**
- **Power source 2 x PP3 9-v batteries**
- **Robust, lightweight, professional**
- **Extremely user friendly**
- **Built-in speaker with headphone socket**
- **Sensitivity control.**

CS-2MXP

SPECIFICATION

- **Super fast response MOTION electronics**
- **Automatic operation**
- **Dual-channel, full-range discrimination**
- **Lightweight, perfect balance, professional**
- **Moisture and dust-resistant**
- **8 x AA cell battery pack. Low power drain**
- **Built-in loudspeaker and headphone socket**
- **25cm SUPERLITE open centre search head**
- **Socket for optional rechargeable batteries**
- **Push-button target pinpoint control**
- **Max depth all-metal mode.**

CS-5MXP

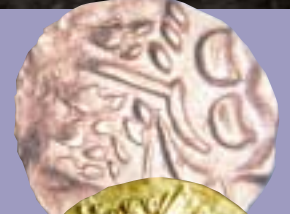

SPECIFICATION

- **Power boosted MOTION circuitry**
- **Fast response. Extra ground coverage**
- **Lightweight, perfect balance, easy to use**
- **Automatic operation**
- **Dust resistant features**
- **Push-button target pin-point**
- **25cm SUPERLITE open centre search head**
- **All metal, super depth mode (with boost)**
- **Built-in speaker, headphone and charger sockets**
- **Dual-channel, full range tone/no tone discrimination**
- **Clear signal intensity/batt. condition indicator.**

C.Scope 'M' class machines are a dramatic step forward in detector power and useability

'M' for 'MOTION' means keep the detector head swinging from side to side at a regular speed. This simple process enables the sophisticated electronics to tune itself to the ground as you go, so the detector needs hardly any adjustment and is always working at peak power. ▶

C.Scope motion machines are the ideal choice for beginners because of their simplicity and professionals like them for their sheer power - and no knob twiddling means they can concentrate on what's important to them... listening for those signals which mean treasure underfoot.

A newcomer to the C.Scope range but with an outstanding pedigree, the **CS1M** takes the cost of MOTION technology right down. MOTION means ease of use combined with superb stability and sheer detecting power. The CS1M is the machine newcomers to the hobby should aim for. It's easy to use, powerful, and very affordable.

To give even more ground breaking performance at this entry level price point, the **CS2MP** is now fitted with a highly tuned, thin section search head. In true professional style, this unit is now capable of being hip-mounted to minimise weight on the arm and allow fatigue-free use over much longer periods of time. Ease of use, optimised depth, light weight, robust, the CS2MP is a winning combination.

As soon as you switch on the **CS2MXP**, the sharp precise audio tone tells you that this is a highly tuned, powerful electronic instrument. The addition of dual channel discrimination means that you can set one channel in the max depth all-metal mode but then confirm target validity with a quick check on the second discrimination channel. A pinpoint switch momentarily switches off the MOTION feature so that you can tell exactly where to dig and retrieve the find quickly. The CS2MXP is C.Scope's top selling mid-range treasure finding machine.

The **CS5MXP** with its POWER BOOSTED electronics takes metal detector performance to the outer limits. Switch-on-and-go electronics coupled with a lightweight package and supreme performance put the CS5MXP firmly at the top of its class. The only way up from here is the computerised versatility of the NEWFORCE R1!! You could pay twice as much for some imported detector with less features than the CS5MXP. Don't waste your time.

If you want maximum MOTION power, to find deep down treasure, the CS5MXP is the right choice!
