

# The C.SCOPE 3MXi delivers Simplicity & High Performance

**C.SCOPE**  
METAL DETECTORS

## REASONS TO CHOOSE THE CS3MXiPRO

The 3MXiPRO is a 'switch-on-and-go' design with automatic tuning activated by the motion of the search-head passing over the ground. The 3MXiPRO offers superb depth of detection and variable discrimination which eliminates the signals from undesirable targets. The highly responsive 3MXiPRO provides a sharp target signal even at fast sweep speeds.

The 3MXiPRO is a hidden gem of a detector that once discovered will soon become an essential piece of your detecting kit. It is designed to offer extremely high performance whilst being easy to operate. We wish you good hunting and a great hobby with the excellent C.SCOPE 3MXiPRO.

*“Plenty of people say they prefer the C.SCOPE ‘Motion’ detectors to machines 3 times the price...”*

*“You will be amazed that such depth and sensitivity can come with such a reasonable price tag”.*

## TECHNICAL

- 17KHZ MOTION SEARCH SYSTEM
- AUTOMATIC RETUNE. SWITCH ON AND GO
- TOGGLE SWITCH TARGET PIN-POINT
- ALL METAL SUPER DEPTH MODE
- VARIABLE RUBBISH REJECTION LEVEL
- BELT MOUNTABLE CONTROL BOX
- CHOICE OF CONTROL BOX MOUNTING POINTS
- ADJUSTABLE STEM
- 8 X AA BATTERY POWER
- SOCKET FOR (OPTIONAL) HEADPHONES
- INTECHANGEABLE SEARCH HEAD OPTIONS

# User friendly High Performance

The CS3MXiPRO is a high performance metal detector operating on the 'MOTION' principle. The CS3MXi is designed to offer extremely high performance whilst being easy to operate.

The CS3MXiPRO features the option of three interchangeable heads to enable deeper detection, greater ground coverage and optimised performance for a variety of situations.

Check out the deals on extra heads - you will be surprised how generous we can be.

A sophisticated **Discrimination System** which is capable of eliminating signals from a variety of metals which are likely to be valueless allowing you to concentrate on more interesting targets.

'Motion' detectors operate at optimum performance when the search head is kept moving with a steady sweeping motion. When you receive signals, the 3MXiPRO features a **Pinpoint Function** which allows you to switch off this motion effect so that the search head can be brought to rest over the exact target location.

If you have a lot of ground to cover and you like to move fast, the highly responsive 3MXiPRO will suit your style of detecting right down to the ground!

*“There are no frills,  
bells and whistles  
on these machines  
- just all the essential  
things which you need  
on a detector.*

*Top general purpose  
detectors for professionals  
and serious amateurs.  
Terrific value for money”.*

*“Unbelievably  
fast response  
even next to IRON”*

*Designed and manufactured  
in the UK - the quality, ruggedness  
and perfect lightweight balance  
of a C.SCOPE detector  
is second to none.  
This quality is allied to C.Scope's  
legendary customer service  
and an unequalled warranty.*
