

## Care of your C.Scope Lithium-Ion Batteries

Your C.Scope Lithium-Ion (Li-ion) battery pack(s) and/or Li-Ion powered Wireless Headphones are designed to provide many years of trouble-free service.

The following instructions should be followed to obtain both the best performance in terms of charging cycles, performance and user safety.

### Handling

Avoid disassembling, crushing, or puncturing the battery. Do not short the external contacts, expose it to temperatures above 60°C, or subject it to excessive shock or vibration. Keep it away from children and do not use a damaged battery.

If a battery pack leaks, do not touch the fluids and dispose of it, as described below.

### Storage

To prevent fires, store the battery packs in the supplied packaging when not in use. You should consider using a lithium-ion battery storage cabinet, which may offer fire protection.

### Transport

C.Scope Battery Packs are subject to legislation on the transport of dangerous goods. When a battery pack is transported, special requirements on packaging and labelling apply. Do not ship damaged battery packs.

### Disposal

C.Scope Battery Packs should be recycled at permitted facilities and not thrown away in household waste or recycling bins.

They contain chemicals that can catch fire and explode, and high-capacity batteries can also deliver an electric shock. You can take lithium-ion batteries to a local recycling centre or hazardous waste collection point. You can check with your local authority or vendor to see if they offer recycling services.

### Applies to the following products:

C.Scope Lithium Ion (Li-ion) battery packs, part numbers :-

YLBP-MD-1 for use with the Cover Locator/Metal Detector.

YLBP-TX-1 for use with the SGA/SGV/MXT (all versions) Signal Generator/Transmitter.

YLBP-XL-1 for use with the XL4 Locator range.

C.Scope Bluetooth Headphones, Part Number YHP/BLUETOOTHWIR and

C.Scope Wireless Headphones, Part Number YHP/WIRELESS-UK and YHP/WIRELESS-EU.
